Founded in 1978, Abbott Electric, Inc. has two locations, one in Canton and one in Dover. The full-service electrical contractor primarily focuses on commercial and industrial electrical projects, but the team also performs retail, residential, fire alarm, security alarm and phone/data wiring projects.

Abbott Electric is a second-generation, family-owned and operated company employing roughly 150 people. It is owned by president Michael Abbott, vice president Steven Abbott, CFO Brent Fatzinger and project manager/estimator Tony Abbott.

At Abbott, they are very focused on serving the communities where their employees live. Their business is built on the support of the community and the relationships that they have established over the years.

Abbott also provides low voltage services such as fire alarms and security alarm systems and monitoring. It also offers design/build services, as well as electrical safety and consulting services. The electrical safety consulting services include arc flash analysis studies and lock-out/tag-out procedures.

Abbott is the largest family-owned electrical contractor in both Stark and Tuscarawas counties. The team at Abbott prides themselves on being large enough to provide confident solutions for all of their customers' electrical needs while still providing the personal touch and value expected from a family-owned business.

Abbott strives to help its loyal customers achieve the best long-term outcome for their projects. Abbott operates its business focusing on safety, honesty and strong relationships. It recently celebrated its 40th anniversary by donating a large Pro Football-themed mural on Canton City Hall.

At Abbott, their mission is to provide quality electrical services to the members of the local community at a fair price.

Over the years, Abbott has won many awards, including the 2003 Canton Regional Chamber of Commerce's Business Excellence Award, the 2018 National Electrical Contractors Association Recognition of Achievement in Safety Excellence, the 2018 Quality Construction Partners Contractor of the Year and the Best Electrician award in The Canton Repository's Best of the Best competition five of the last seven years.
